OVERVIEW

Python Developer Intern at Alphawizz Technology and final-year B.Tech Computer Science and Engineering student with hands-on experience in Python, SQL (MySQL), and data visualization. Built data-driven applications, including a predictive crime analysis platform with time-based risk modelling and interactive Chart.js dashboards, and a responsive smart waste management platform backed by MySQL. Strong foundations in data structures and algorithms, statistics, and database management system. Seeking a Python Developer or Data Analyst role to build reliable software and turn complex datasets into actionable, data-informed decisions.

EDUCATION

Chandigarh Engineering College , Jhanjeri **2023 – 2027**
*B.Tech in Computer Science And Engineering - **CGPA - 7*** *Mohali, Punjab*

Coursework: Data Structures And Algorithms, Computer Networks, Compiler Design, Artificial Intelligence, Database Management System, Operating System, OOPS concept

Shri Barfani Academy **2020**
*MPBSE - Senior Education - **Percentage - 79%*** *Indore, Madhya Pradesh*

Merit Higher Secondary School **2018**
*MPBSE - Secondary Education - **Percentage - 78.8%*** *Indore, Madhya Pradesh*

EXPERIENCE

Python Developer Intern **August 2026 – Present**
Alphawizz Technologies Pvt. Ltd *Indore, Madhya Pradesh*

- Develop and maintain backend features for web applications using Python and Django, including models, views, forms, and admin panel configuration.
- Build and integrate RESTful APIs with Django REST Framework, covering serializers, viewsets, routing, and CRUD endpoints for 20+ modules.
- Design and connect a MySQL database to the Django backend, defining models and writing ORM queries for data storage and retrieval.
- Deploy Django applications and APIs to production on Render, configuring environment variables, settings, and database connection for the live environment.
- Collaborate with the team using Git and GitHub for version control, code reviews, and issue tracking.

PROJECTS

KirayaSaathi – Rental & Property Management SaaS | React, Django, PostgreSQL **Live**

- Built a full-stack rental and property management SaaS for landlords and PG/hostel owners, covering property and room allocation, tenant onboarding, and rent tracking.
- Developed a Django REST Framework backend and a React 19 and TypeScript frontend, with PostgreSQL in production and MySQL (TiDB Cloud) support.
- Implemented room-wise electricity sub-meter billing with automated per-unit calculation and utility bill generation.
- Built rent ledger, partial payment tracking, and security deposit management with deductions and refunds.
- Added dynamic UPI QR payments, WhatsApp payment reminders, and client-side PDF invoice generation, with an owner dashboard for revenue and occupancy analytics.

KiraayaGrid – Accommodation Discovery & Property Management Marketplace **October 2026**
Python, Django, MySQL, HTML5, CSS3, JavaScript

- Developed separate admin, owner, and seeker panels with role-based access, covering owner verification, property approval, and listing moderation.
- Implemented owner-side listing management, including room and bed setup, pricing, availability tracking, photo upload, and enquiry management.
- Built seeker-side search with filters, property comparison, saved listings, enquiries, and visit requests.
- Designed a public website with a landing page, property discovery, property detail pages, and location-based exploration, backed by a Django and MySQL data model.
- Built an accommodation marketplace connecting students, professionals, and relocating users with PGs, hostels, flats, and private rooms, addressing scattered listings and unclear pricing.

Physio Consultation Booking Platform – Neurorehabilitation **November 2026**

Python, Django, MySQL, HTML5, CSS3, JavaScript

- Built a Django and MySQL booking platform for a neurorehabilitation physiotherapist, with 10, 20, and 30-minute consultation options and time-slot management.
- Designed relational models for doctor profiles, appointments, and patient records, with a doctor dashboard to view and manage schedules.
- Developed a public doctor profile page presenting qualifications, expertise, and consultation plans, with a patient-facing booking flow.

CSAPR – AI-Based Smart City Safety & Prediction Platform | **March 2026**

- Designed an AI-driven smart city system to facilitate real-time incident reporting, emergency notifications, and safety monitoring.
- Designed and developed predictive crime analysis models using time-based and pattern-based risk estimation.
- Designed interactive analytics dashboards to visualize crime trends, hotspots, and safety metrics using Chart.js.
- Engineered a system for the detection of crime hotspot zones dynamically.
- Designed a modular admin dashboard for incident management, governance, and user control.
- Simulated the integration of IoT infrastructure for smart city ecosystems.
- Enhanced the efficiency of decision-making through the implementation of data-driven safety insights and forecasts.
- Designed with scalability and real-world deployment considerations aligned with Smart City initiatives.

KachreWala – Smart Waste Management Platform | **December 2025**

- Developed a responsive front-end system for a digital waste management platform to enhance citizen-service interaction.
- Developed user interface flows to enable users to schedule waste pickups, report complaints, and view live tracking.
- Integrated data handling using MySQL to store data effectively.
- Improved user experience through clean design, faster loading, and accessible layout.
- Part of a system that encourages citizens to live sustainably by adopting a digital sanitation ecosystem.

TRAINING

Vital Skills **JUNE 2024– JULY 2024**

Trainee *Mohali, Punjab*

- Learned Python language, integrated with AI .
- Worked on practical project i.e. face recognition

TECH-STACK AND SKILLS

Languages: Python, MySQL, Excel, HTML, CSS, JavaScript
Developer Tools : VS Code, MATLAB, Jupyter Lab, GitHub, GCP
Soft Skills: Problem Solving, Logical thinking, Teamwork

CERTIFICATIONS AND ACHIEVEMENT

- Google Cloud Arcade Facilitator Program – Completed twice; received swag kits from Google Cloud both seasons (recognition for community leadership and cloud skill promotion).
- McKinsey Forward Learning Program – Completed certificate program covering problem-solving, communication, and digital-age leadership skills.
- Google Play Store Certificate – Completed Google's official certification related to the Play Store ecosystem.
- HackerRank - **SQL Intermediate**
- National Level Hackathon - **Valutheist-2025**
